

Executive KPI Framework & Configuration Blueprint

Scope: 11 Core Financial KPIs (ACDOCA / FI / CO) **Target Audience:** CFOs, Controllers & BI Architects **Status:** Production Ready

Framework Architecture: This document outlines the real configuration specifications for 11 critical financial and managerial KPIs derived from SAP S/4HANA Universal Journal (ACDOCA), Controlling (CO), and Subledger (FI - AR/AP) datasets. Each KPI includes its formula, SAP source tables, business purpose, and target thresholds.

1. Profitability & Top-Line Metrics

1. Total Revenue Top-Line

Formula: $\sum \text{Credit (ACDOCA)}$ where $GL_Category == 'Revenue'$

SAP Source: ACDOCA (HSL converted to Company Code Currency)

Purpose: Measures gross financial inflow from sales and operations.

Threshold: $\geq$ Target Budget (+5% MoM growth)

2. Total Expenses Cost Control

Formula: $\sum \text{Debit (ACDOCA)}$ where $GL_Category == 'Expense'$

SAP Source: ACDOCA + Controlling (CO) Cost Elements

Purpose: Tracks operational expenditure burn rate across departments.

Threshold: $\leq$ Approved Departmental Budget

3. Net Profit Bottom-Line

Formula: $Total\ Revenue - Total\ Expenses$

SAP Source: Aggregated Income Statement (P&L) Accounts

Purpose: Computes ultimate net earnings after all operational costs.

Threshold: $\geq$ 15% Net Profit Margin

4. Profit Margin Efficiency

Formula: $(\text{Net Profit} / \text{Total Revenue}) \times 100$

SAP Source: Calculated KPI from P&L Summary Table

Purpose: Evaluates pricing power and operational cost efficiency.

Threshold: Industry Benchmark $\geq$ 18.5%

5. Cash Flow Liquidity

Formula: $\sum \text{Incoming Payments} - \sum \text{Outgoing Disbursements}$

SAP Source: BSIS / BSAS Clearing & Bank Ledger Accounts

Purpose: Measures immediate liquidity and cash buffer health.

Threshold: Positive Operating Cash Flow (> 0)

2. Working Capital & Subledger Metrics

6. Accounts Receivable (AR) Subledger

Formula: $\sum \text{Open Customer Balances (AUGBL == Blank)}$

SAP Source: BSID / ACDOCA (Customer Open Item View)

Purpose: Tracks outstanding money owed by customers for goods/services.

Threshold: DSO $\leq$ 45 Days

7. Accounts Payable (AP) Subledger

Formula: $\sum \text{Open Vendor Balances (AUGBL == Blank)}$

SAP Source: BSIK / ACDOCA (Vendor Open Item View)

Purpose: Monitors short-term obligations owed to suppliers and vendors.

Threshold: DPO Between 30–60 Days

8. Outstanding Invoices Collection Risk

Formula: Count of Invoices where $Payment_Status == 'Open'$

SAP Source: ACDOCA filtered by AR Document Types (DR, RV)

Purpose: Identifies total volume of unpaid customer receivables.

Threshold: $<$ 15% of Total Monthly Billings

9. Paid Invoices Collections

Formula: Count of Invoices where
Payment_Status == 'Cleared'

SAP Source: ACDOCA with populated
clearing doc (*AUGBL*)

Purpose: Validates successful
collection throughput and
cash inflows.

Threshold: >= 85% Collection Rate

3. Managerial & Dimensional Performance Metrics

10. Cost Center Performance CO-OM-CCA

Formula: $(Actual\ Expenses / Budgeted\ Expenses) \times 100$
per *KOSTL*

SAP Source: ACDOCA joined with Controlling Budget Table
(COSP)

Purpose: Evaluates departmental spending variance
against allocated budget.

Threshold: Budget Variance within ±5%

11. Profit Center Performance EC-PCA

Formula: $Segment\ Revenue - Segment\ Expenses$ per
PRCTR

SAP Source: ACDOCA filtered by Profit Center Dimension

Purpose: Measures internal divisional ROI and
profitability contribution.

Threshold: Positive Segment Contribution Margin
